Mailbox Care Instructions and Suggestions

Caring for your mailbox is as easy as 1-2-3.

1. Pick-up some Wash/Wax combo at your local auto parts store. We recommend Rain X / 20 oz. High Foaming with Carnauba Wash and Wax. This product, and similar products to it, have a wax suspended in the cleaner, which allows it to wash away the wax residue that can otherwise leave a paste wax and can leave streaks. Please do not use a paste wax like turtle wax.
2. Get a soft, hand-held car wash brush or sponge, a chamois (shammy), and a small bucket. Place a few ounces of the wash wax into the bucket and fill it with cool water until it is nice and foamy.
3. Get the mailbox thoroughly wet with a hose. Apply the foamy wash/wax liberally over all surfaces of the unit. Then simply rinse thoroughly so that all of the suds are gone. We recommend use of a chamois to absorb and dry the water from the mailbox.

We suggest repeating this process monthly
